These finishes feature 70% KYNAR 500®/HYLAR 5000® polyvinylidene fluoride (PVDF) resins, coil coated to ensure the highest color uniformity and quality. Colorweld 300 coatings exhibit outstanding color and gloss retention, and are considered the premier architectural coating for metal. They provide excellent flexibility and film adhesion for forming, and offer superior resistance to humidity, impact, salt spray, pollution, abrasion and graffiti.
